Essays

What excites you about a career in engineering/technology? Why do you think your abilities and skills are a good fit for Plaksha's B.Tech program?

I am excited about a career in engineering and technology because I have always been deeply interested in mathematics and physics, particularly their application to real-world problems. These subjects intrigue me because they provide solutions to everyday challenges. By pursuing engineering, I can implement these concepts in practical ways and use my knowledge to make a meaningful impact on society and the environment through the evolving technology that helps create life-changing solutions. Engineering combines my passion for physics and mathematics with creativity, offering numerous growth opportunities and challenges.

I'm eager to learn, experiment, innovate and grow. I have creative approaches to problems, and I believe that engineering is a perfect fit for me as it is as much about imagination and creativity as it is about logic and theory. Collaboration with peers and meeting like-minded people would help me explore and open myself to new ideas and possibilities.

I believe my abilities and skills align well with Plaksha's B.Tech program. My enthusiasm for mathematics and physics reflects my logical and analytical approach to problem-solving, which is essential in engineering and technology. Additionally, my love for sports like basketball and cycling demonstrates my teamwork, strategic thinking, and leadership skills. These traits would be invaluable in collaborative projects at Plaksha. Furthermore, my dedication to sports highlights my discipline, perseverance, and determination, which will help me balance the academic and extracurricular demands of the program.

Share a time when you contributed to a project or activity that positively affected your school or community. What challenges did you face, and what did you learn about leadership and perseverance?

During class 11, our newly formed section brought together a diverse group of boys with varying sports preferences. And to make it worse, we had a sports period every alternative day, leading to constant fights between the groups and lots of time wasted deciding what to play. Initially, I was drawn to joining one of the sides, but instead, I decided to keep my personal preferences aside and try to find a solution. We made a complete list of what sport everyone would prefer and what they know to play. Though the number of people playing some sports like basketball and table tennis was less, we still decided to manage a solution so as to let them play their choice of sport as well. There seemed to be no option, but finally, we arrived at a solution by talking to one other class which had two periods with us and worked out a compromise to ensure that each team had an adequate number of players. On the other days, the people playing basketball would join football to keep the teams balanced. This taught me that even if there is no solution in sight, having a little perseverance and out of the box thinking can help find better solutions. It taught me how keeping aside personal preferences for addressing the collective needs can help in the long run.

Is there anything else which you would like to share with us which would help us understand you better?

No

Description

Extra- Curricular Activities (Outside the Classroom)

	Activity	Highest level of participation	Number of years of participation	Positions of responsibility/ achievement
1.	Basketball	Intra School	4	Point Guard
2.	Mental Ability- Mathemania- The Math Fest	Intra School	1	Certificate of Achievement

Please Upload Your File.

Yes

Co- Curricular Activities (Tinkering, Research and More)

	Activity	Highest level of participation	Number of years of participation	Positions of responsibility/ achievement
1.	SOF National Science Olympiad	International	1	School Rank 3, Zonal Rank 190
2.	SOF International Mathematics Olympiad	International	1	School Rank 3

Please Upload Your File.

Yes

Additional Information

Preferred Major

Computer Science and Artificial Intelligence
