What excites you about a career in engineering/technology? Why do you think your abilities and skills are a good fit for Plaksha's B.Tech program?

Engineering Technology excites me because it bridges the gap between theoretical concepts and real-world applications. The hands-on approach, problem-solving challenges, and innovation-driven mindset align with my passion for creating impactful solutions.

I believe my analytical mindset, creativity, and adaptability make me a strong candidate for Plaksha's B.Tech program. My problem-solving skills, coupled with a strong foundation in mathematics and science, enable me to tackle complex engineering problems. I enjoy working on interdisciplinary projects, and Plaksha's focus on entrepreneurship, leadership, and hands-on learning aligns with my aspiration to develop technology-driven solutions. Additionally, my collaborative nature and curiosity to explore new technologies will allow me to contribute meaningfully to Plaksha's vibrant learning environment.

Share a time when you contributed to a project or activity that positively affected your school or community. What challenges did you face, and what did you learn about leadership and perseverance?						
During my time at School & college, I played a key role in organizing a whitehat Junior Coding program & Robotics project, where we aimed to showcase student-led technological solutions to real-world problems. My primary responsibility was ensuring the event's smooth execution. One major challenge was time management—balancing academics while leading the initiative. Some participants also faced technical difficulties in their projects, which required troubleshooting on the spot. This experience taught me the importance of delegation and teamwork-no project succeeds without a strong, collaborative effort. I also learned the value of staying composed under pressure, as unexpected issues always arise. Most importantly, I realized that leadership is not just about making decisions but about empowering others, ensuring everyone contributes their best.						
Is there anything else which you would like to share with us which would help us understand you better?				No
