Essays

What excites you about a career in engineering/technology? Why do you think your abilities and skills are a good fit for Plaksha's B.Tech program?

The thing that excites me about a career in engineering is that we get to work on improving the existing technology and invent new things, as i was growing up i saw so many new things being added to our life and i wanted to be a part of it. I used to watch NASA'S launches on TV, from then i had lot of desire to be a part of that. Plaksha's B.Tech program has different courses as opposed to other engineering colleges which caught my attention. i. think my knowledge and interest in physics will be useful for the robotics and cyberpyhsical sysems course in Plaksha's B.Tech program.						
Share a time when you contributed to a project or activity that positively affected your school or community. What challenges did you face, and what did you learn about leadership and perseverance?						
I remember when i was in 7th class,there was a science fair and everyone formed groups to make a project.I made a group with 3 of my firends and we started thinking about our project and we were not getting any good ideas but we decided to take some time instead of rushing with the first idea that came to our mind. we made a devices which can find pythagorean triplets using three scales and pulley ,two scales are perpendicular to each other along x and y axes and the pulley can change the angle at the third scale is inclined, we waited for a good idea and thus we won bronze medal in the science fair						
Is there anything else which you would like to share with us which would help us understand you better?					No	
Description						
Additional Information						
Preferred Major					Robotics and Cyber Physical Systems	
References						
	Name	Organization	Designation	Mobile Number	Email ID	In what capacity does this reference know you?
